

Evaluation 101 Workshop

This is a three-hour workshop designed to provide practitioners with an understanding of the theory and practice of evaluation for injury prevention, including the tools needed to develop and implement effective evaluation. The overall approach is based on the use of a logic model for rendering evaluation results.

Topics covered will include:

- An introduction to useful evaluation
- Importance of a logic model
- Applied practical steps for success
- Injury specific examples

Who Should Attend

This workshop is for injury prevention practitioners who require and hope to integrate the evaluation process into project planning for injury prevention.

Goal

The goal of the workshop is to increase participants' skills related to evaluation for injury prevention.

Objectives

By the end of the workshop, participants will:

- Appreciate the need for evaluating injury prevention programs
- Identify principles of a participatory evaluation approach
- Identify important evaluation questions
- Understand the steps of the evaluation process
- Develop skill in designing and conducting an evaluation
